

INCREASED VENTILATION FOR CLEAN AIR

OPTIMAL HEALTH & SAFETY IN YOUR HVAC SYSTEM

FREEZE BLOCK TECHNOLOGY & ENERGY RECOVERY VENTILATION

Ventilation is one of the important strategies recognized by ASHRAE in combating airborne transmission of infectious diseases¹. The only way to achieve 100% clean air is to use 100% outside air.

Freeze Block Technology along with an Energy Recovery Ventilation System utilizes 100% outside air and protects vulnerable coils from freeze damage while maintaining a high level of energy efficiency.

Upfront costs are competitive to other options, but the long term gain cannot be beat for health, safety and energy efficiency.

Stay Healthy.
Stay Green.

ENERGY RECOVERY VENTILATION

FREEZE BLOCK COIL
RETURN BENDS INTACT

UNPROTECTED COIL
